

# Attend Events

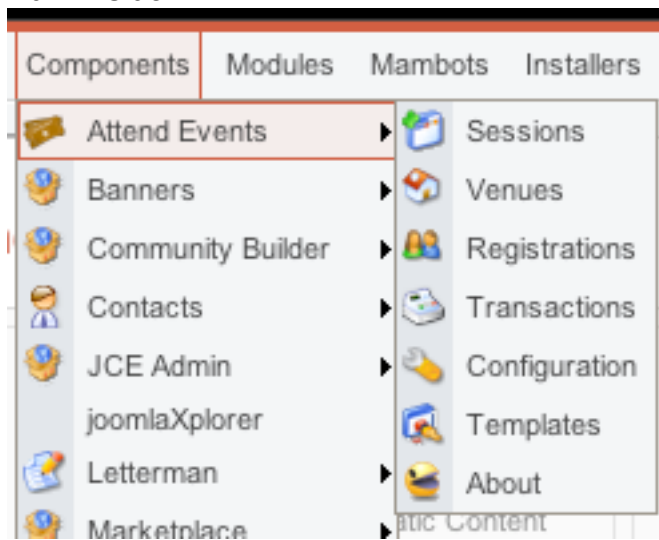

as told to: Joomla SouthEast March 20th, 2008 by Brent Laminack

Home Page at JoomlaCode: [http://joomlacode.org/gf/project/attend\\_events](http://joomlacode.org/gf/project/attend_events)

Two branches: stable: 0.8.4 and development: 0.9.0 Build 26 (reviewed)

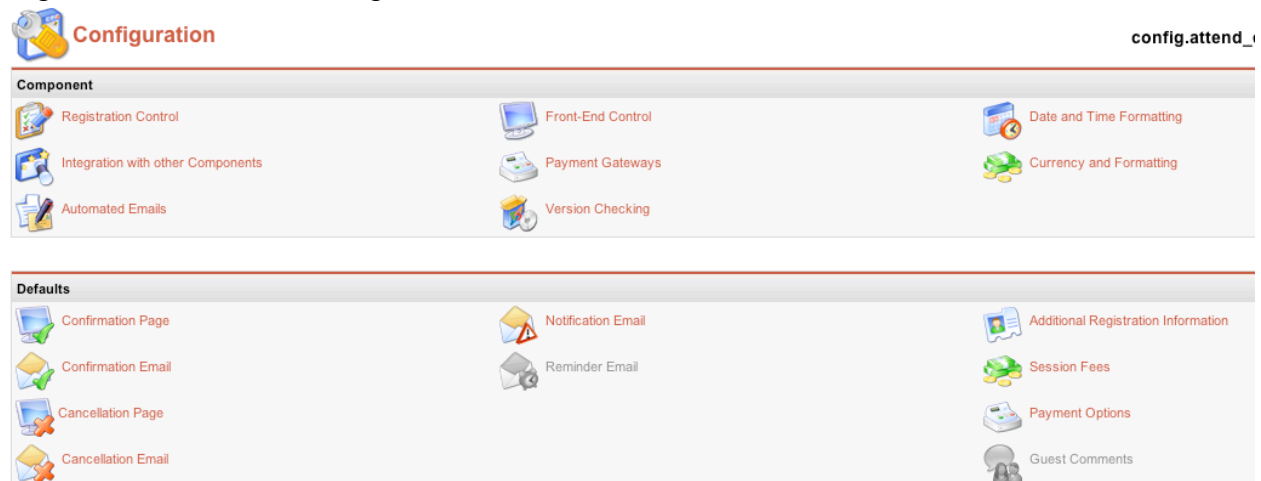

Fairly standard install: component, module for upcoming events, Community Builder plugin, JEvents bridge plugin, search mambot.

Admin side:

**Venues:** Places where events take place: name, address, city, state, zip

**Templates:** lets you edit the HTML for: list of sessions, session details, venue details, registration form, list of registered attendees.

**Sessions Admin:** The most JavaScripty Joomla component I've ever seen. Title, Description, Registration Period (start & end), Venue, Session Capacity, Additional Registration Fields (create on the fly), Session Fees, Payment Options (paypal), Confirmation page (template), Confirmation email, Cancellation Page, Cancellation email, Notification email.

**Registrations:** lists who's registered for what.

**Pros:** Great for recurring events, can set up default fields, etc. Google Maps integration

**Cons:** doesn't have discounts or promo codes, only way to see all fields of all registrants is to do a csv export. Only PayPal payment.

### Project Activity:

**General Sections**
